ABOUT ME

AI & Data Science student with a strong interest in Artificial Intelligence, Machine Learning, Flutter development, and Full Stack Development. Experienced in developing mobile applications and IoT-based solutions through academic projects and internships. Passionate about building practical software solutions that combine innovation with real-world applications.

EDUCATION

Mount Zion College of Engineering and Technology

2023 – 2027

B.Tech – Artificial Intelligence & Data Science

EXPERIENCE

Flutter Developer Intern

JUN 2025 - 1 MONTH

Gateway Software Solutions

I developed cross-platform mobile applications using Flutter, integrating Firebase and REST APIs to deliver responsive, user-friendly, and scalable solutions.

Backend Developer

Dec 2025 – Jun 2026

Pass Science Work

I have developed a language platform named UPI Language, which enables direct hardware execution of mathematical operations. It is designed to support multiple regional languages and is being developed as part of IIT research.

PROJECT

Flutter Developer Intern

Built an IoT-enabled smart water tank monitoring system using NodeMCU with real-time monitoring, automated alerts, and dashboard-based water management.

Certificate Generating App

Built an IoT-enabled smart water tank monitoring system using NodeMCU with real-time monitoring, automated alerts, and dashboard-based water management.

MZ MarkDigitizer

Developed an AI-powered OCR marksheet digitization system that automatically extracts student information and marks from scanned answer sheets, validates the data, and converts it into structured digital records for efficient result processing.

EvalAI

Developed an AI-powered web-based answer sheet evaluation system using the Claude API to automate batch assessment, generate accurate results, and simplify the examination evaluation process.

SKILLS

- Python
- Frontend Developer
- Flutter
- Java
- FastAPI
- React.js
- Firebase / Supabase
